Smartfloor Aluminum Floor Solution

Fast. Simple. Flexible. Safe. The Smartfloor aluminum floor enables quick and flexible design of the vehicle interior with individual seats, benches and even wheelchairs. The Smartfloor vehicle floor is designed individually and consists of various aluminum profiles that are glued into the vehicle. This turns an empty van, camper van or panel van with an empty passenger compartment into your individual vehicle in no time at all, with countless variations in the seating and positioning of different expansion modules.

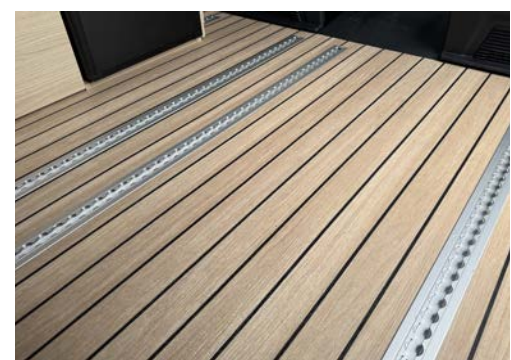

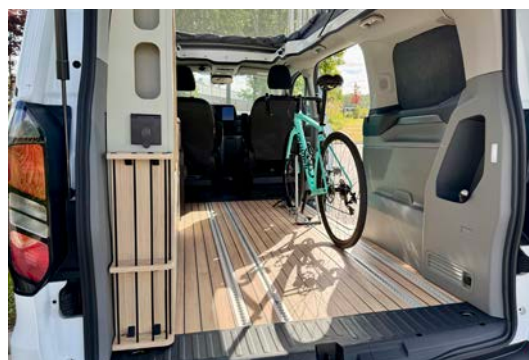

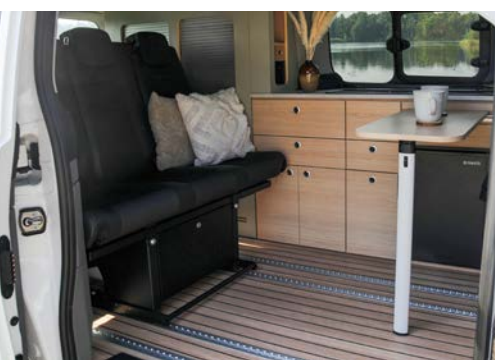

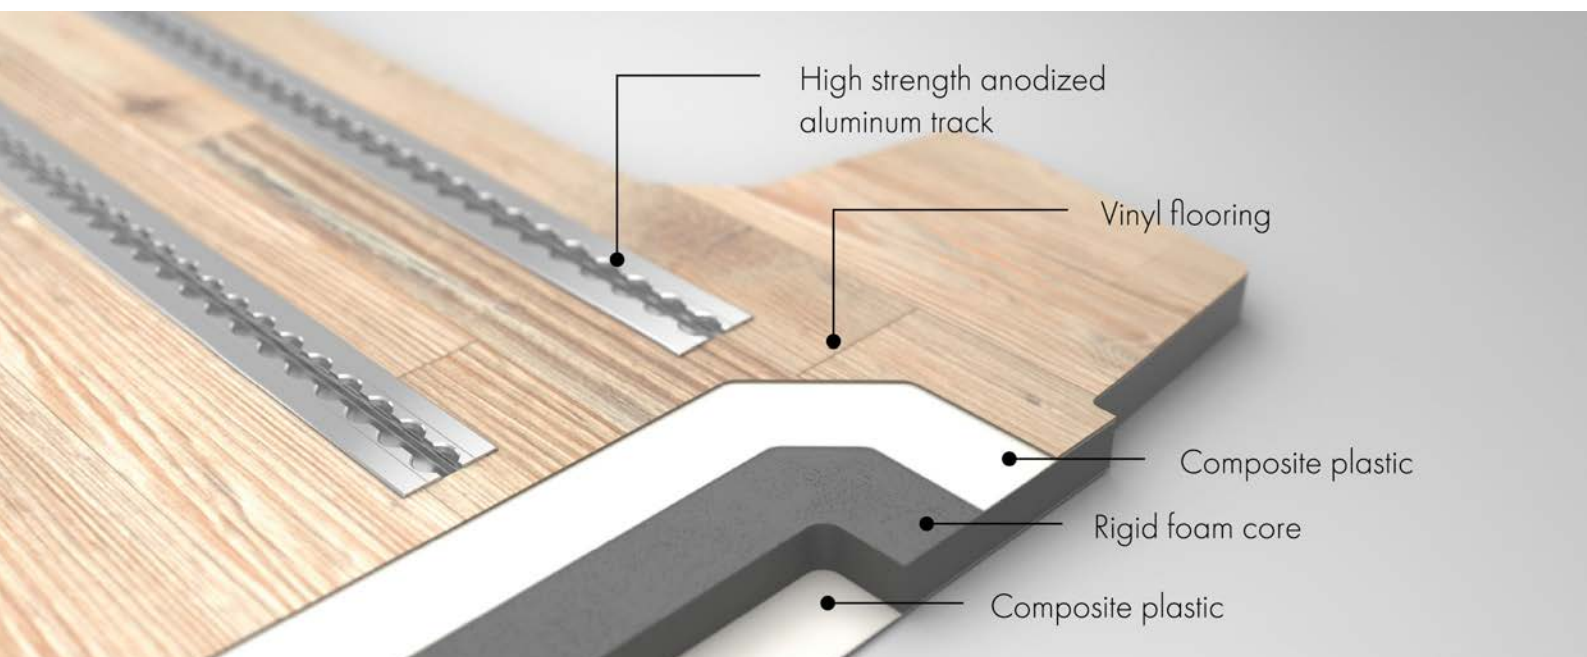

NEW: Smartfloor Revolution

The patented Smartfloor Revolution consists of a high-quality XPS panel, which is processed in our factory with the latest technology, the highest precision and the utmost care. With a weight saving of around 30% compared to conventional floors, the Smartfloor Revolution helps to reduce fuel consumption and enables a higher payload for luggage and other items.

Advantages of the Smartfloor Revolution:

- » Maximum time saving during installation
- » The world's lightest system floor
- » Optimum acoustic and thermal insulation
- » Smooth-running Smartseats and Smartbenches
- » Guaranteed parallelism of the aluminum rails

Design Flooring made of PVC

Our self-adhesive PVC flooring combines elegant design with excellent slip resistance (R10).
