Smarttourer camper van

Safe, flexible and spacious. With Smarttourer camper vans, everyone can realize their personal dream of van life in an individual way – from full or partial conversions to individual components. The customer decides what best suits their needs!

The new Smarttourer is built on the Ford Tourneo Custom Camper platform and is available in both L1 and L2 versions.

If you decide to convert your camper van, you can choose from three tailored packages:

- » **Smarttourer Traveler**
- » **Smarttourer Traveler +**
- » **Smarttourer Explorer**

The best part: All three conversion options come with official motorhome certification for your camper van!

Smarttourer Traveler

The Smarttourer Traveler is your perfect partner for everyday life and adventure – practical, flexible, and thoughtfully designed down to the last detail. The robust Smartfloor Revolution in gray wood finish provides a stylish and durable base that not only looks great but is also highly versatile.

The comfortable 3-seater Smartbench Comfort with ISOFIX can be effortlessly converted into a cozy sleeping area for up to two people and also features an integrated storage drawer for your belongings. Swiveling driver and passenger seats expand the living area in an instant, creating an inviting seating arrangement for relaxed breaks or social evenings.

The clever interior makes the Traveler especially flexible: a compact electric cooker at the rear is ready for quick meals, while a practical table integrated into the rail system is always on hand when you need it.

Furthermore, your Traveler can be individually upgraded: whether it's a shore power connection with 230V socket, a protective awning, fully electric step, dual sliding doors, a powerful parking heater, a fridge drawer under the bench, or up to two additional Smartseats – you decide what fits your lifestyle.

Smarttourer Traveler +

The Smarttourer Traveler + combines the everyday flexibility of the Traveler with a noticeable increase in space and comfort. The highlight of this conversion package is a spacious pop-up roof, instantly providing a generous interior with comfortable standing height and two additional sleeping spaces – perfect for spontaneous weekend trips or extended getaways with up to four people. From urban streets to remote backroads, the Traveler+ offers a smart and effortless entry into van life.

Smarttourer Explorer

The Smarttourer Explorer is your invitation to travel without compromise. As the premium variant of our camper conversions, it provides everything you need for maximum freedom and comfort on the road. The high-quality Smartfloor Revolution in elegant marine finish forms a stylish base while providing a durable, low-maintenance foundation. The Smartbench Comfort 3-seater bench with ISOFIX, integrated storage drawer and generous sleeping surface of 1,180 x 1,917 mm quickly transforms your vehicle into a cozy sleeping area. Combined with the pop-up roof, which provides additional space and another comfortable double bed, you have a total of four comfortable sleeping places. Swiveling driver and passenger seats also create an inviting living and dining area.

The thoughtfully designed kitchen and cabinet unit includes everything you need on the go: a 2-burner stove, a stainless steel sink, a 42-liter refrigerator with freezer compartment, a 12-liter fresh water tank and a 12-liter grey water tank, as well as a stowable table for relaxed cooking and dining. In addition, a practical outdoor shower with a 12-liter water tank and shower set provides refreshing moments on the road – perfect after beach days, sports, or outdoor adventures.

With the Electric Package Plus, you stay independent and fully powered. It includes a shore power connection with 230V socket, an 800W peak inverter, a charger, modern USB-A and USB-C ports and efficient, mood-setting LED lighting.

Optional: Offroad-Package

If you like, we can upgrade your Smarttourer with our Offroad Package. This enhancement not only gives your vehicle a distinctive and confident character but also provides genuine off-road capability for adventures beyond paved roads. The package includes the Irmscher all-terrain wheel set, a striking front protection bar, the robust Irmscher side step kit and matching off-road graphics that complete the rugged look.

Smartbench Comfort

Sit Safely – Sleep Comfortably! In everyday use, the Smartbench provides comfortable seating for the whole family and on holidays, it can be quickly converted into a cozy bed. We offer the seating and sleeping bench in various configurations and sizes, such as 2- or 3-seater versions. The Smartbench can, in principle, be installed in any standard commercial vehicle.

For optimal protection of all occupants, each seating position comes standard with a three-point diagonal seatbelt. ISOFIX anchor points are also included as standard, allowing for the safe installation of child seats.

Thanks to an intuitive folding system with high user-friendliness, the practical bench can be transformed into a comfortable sleeping surface. The length of the bed is approximately 190 cm.

Smartseats – Individual seats for every situation!

Depending on how you plan to use your camper van, extra approved seating can be a real advantage for everyday trips. The Ford Tourneo Custom Camper is approved for up to seven passengers, offering flexibility and comfort for every journey.

Note: This depends on the vehicle's payload and gross vehicle weight rating.

Our Smartseats combine the highest safety standards with first-class quality. All models are tested and approved according to the latest UN/ECE regulations for M1 vehicles, including ECE R14, R16 and R17. They are, of course, also certified for use in combination with the Smartfloor Revolution. In terms of design, materials and comfort, our seats leave nothing to be desired.

Smartfloor Revolution

The Smartfloor Revolution is a world-first in the camper van segment. Made from high-quality XPS, it is the lightest modular floor system in the world. It impresses with maximum time savings during installation, outstanding acoustic and thermal insulation and smoothly operating Smartseats and Smartbenches for flexible use of space.
